DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to a resorbable thin membrane comprising a mammalian body resorbable polymer, classified in class 424, subclass 428.
- II. Claims 33-50, drawn to a generic resorbable membrane characterized only via a surface and at least one thick portion, classified in class 424, subclass 428.
- III. Claims 51 and 52, drawn to a resorbable scar-tissue reduction micro-membrane characterized via an implant configuration, classified in class 424, subclass 422.

The inventions are distinct, each from the other because:

The inventions of Groups I, II, and III are directed to related inventions. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the inventions of Groups I, II, and III have different design and functions as summarized in the brief descriptions given above for the Groups. Therefore, an undue search burden would be required to search them together thus supporting this restriction requirement.

Art Unit: 1614

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
